

AGS1000 SERIES CONTROL PANEL

The AGS1000 series control panel is used to connect gas detectors of AIYI Technologies. Each channel configuration is customizable with reliable performance. Among them, AGS1000B is equipped with UPS uninterruptible power supply, and AGS1000D is an explosion-proof type, which can meet the different needs of different places. They are widely used in petroleum, chemical, energy, steel, metallurgy, gas, and other industries.

Features

- 4-20mA, RS485 signal input is optional.
- Up to 64 channels (RS485), up to 32 channels (4-20mA),
- Large color LCD display with rich information and sound alarm.
- Real-time status indication with light for power, alarm, fault and self-test.
- Multi functions with channel block, alarm set, and fault alarm. Support to check alarm records and fault records.
- AGS1000B has a built-in UPS, which can still work normally after the main power is cut off.
- Built-in 3 relays (alarm-1, alarm-2 and fault)
- Wall-mounted carbon steel housing, much durable.

Specifications

GAS DETECTION SYSTEM

Gas detection system can be widely applied in places such as petrochemical engineering, chemical engineering, steel, metallurgy, pharmaceuticals, electricity, food, and logistics where the monitoring of flammable and toxic gas is needed.

The system is made of gas detector, controller and sound-light alarm, and the gas concentration data will be uploaded to the control panel. The controller collectively displays the gas concentration data of different monitoring points, and the sound-light alarm will be set off in case that any concentration exceeds over the default value. Linkage feature can be realized and the data can be also uploaded to host systems such as DCS/IPC.

FUNCTION

DIAGRAM of GAS DETECTION SYSTEM

1. gas detector

The gas detector is fixed in areas such as the workshop, warehouse, and storage tank for real-time monitoring of the concentration of flammable and toxic gases.

2. zone control

The controller collectively displays the gas concentration, and the sound-light alarm will be set off in case that any concentration exceeds over the default value.

3. The interlock control

It comes with relay output and fault output for the performing of automatic fan, spray, valve, and alarm.

4. The host computer

Standard 4-20mA and RS485 signal output, compatible with host computers such as DCS/PLC/IPC.
